

ENVIRONMENT, HEALTH & SAFETY POLICY

Viterra is a leading agribusiness, with extensive operations across North America. At Viterra, our fundamental values and beliefs about environment, health and safety are an integral part of our business designs, procedures and work practices.

We are committed to protect the environment and the health and safety of our employees, customers, contractors and the community affected by our business activities.

Our goal is to prevent injuries, protect against negative health impacts, and minimize environmental impacts.

We will comply with all applicable laws, regulations, internal programs and procedures, and participate in industry and government activities aimed at improving the environment and worker health and safety.

WE WILL:

- create a work environment where all jobs can be performed in a safe and healthy manner,
- manage our business and operations to prevent occupational injuries and illnesses, and
- minimize wastes and emissions and promote resource conservation and environmental stewardship.

We are all responsible and accountable for making our total environment, health and safety system work.

Kyle Jeworski

Chief Executive Officer,
North America
