

Pioneer® Identity Preserved

CANOLA, **ELEVATED.**

NEW

P592G

A great fit for your rotation, P592G, features Optimum® GLY herbicide flexibility paired with Pioneer® Identity Preserved genetics for top-end yield potential and profitability.

Designed for Western Canadian growing conditions, Pioneer® brand P592G combines strong disease protection with Optimum® GLY herbicide tolerance. This allows you to take control of tough-to-manage, Group 1 resistant wild oats without sacrificing performance or crop safety.
